

Innovation in the Social Sector

We have extensive experience working in the social sector, challenging philanthropies to reconsider long-standing operational practices and protocols

Case Example: Design and develop innovation strategies

Building a future education strategy

- Conducted extensive ethnographic field research, including 70+ interviews with teachers, students and subject experts across 8 states to understand first hand the frontiers of education
- Engaged foundation and external partners in a series of collaborative workshops to share findings, define new solutions and catalyze a field-level network willing and capable of advancing innovative reform
- Co-constructed a 5-year investment plan to support and grow the foundation's innovation strategy in the education space
